Technical Data Information

Product name : ADCOAT Graffiti Klean has been developed to be used in conjunction with our SGAG anti-graffiti film laminate.

Product Description:

Our in house product testing has resulted in continual removals of various types of graffiti such as permanent marking pens, spray pack enamels, road marking paints and acrylic paint from surfaces that have had the ADCOAT SGAG anti-graffiti film laminate applied without damage to the film.

Graffiti was left on the test panels for up to 6 months exposed to outside elements and in a controlled method was removed successfully at different intervals during this timeframe.

Application of the remover is simple and without the need of harsh abrasive cleaners which would only scratch or damage the film laminate.

Product User Guide :

Safe Handling : PPE equipment such as disposable latex gloves and safety glasses should be worn whilst using this product

1. Apply the remover either by the spray bottle or a soft bristle brush onto the graffiti.
2. Work the remover into a small section of the graffiti with brush and allow the remover approx. 5 mins of dwell time to soften the graffiti.

Note: You may find that as soon as the remover is applied to the graffiti that its starts to react immediately if this is the case then wipe off the softened graffiti with a dry cotton cloth.

3. Once the graffiti has softened wipe off with a dry cotton rag. If the graffiti is thick it may require further applications of the remover and repeating of the cleaning procedure until all the graffiti is removed.
4. If smearing of the graffiti occurs simply spray a light amount of the remover over the smear in a "spray and wipe" action with a dry cotton cloth.
5. With all the graffiti removed, the area where the remover was applied MUST be washed down with clean water either by hand or using low pressure cleaning to neutralise the remover.

DO NOT USE any abrasive tools such as steel wool, scourers, scrappers when using this product as you will damage the protective film.

Product Sizes: available in 250ml and 500ml spray bottles.
